Features

- Low cost per clean
- Made from anti static resin
- Comfortable design with single action cleaning
- Automatic advance ensures each clean is performed with fresh cleaning tape
- Extendable tip reaches recessed connectors

Product description

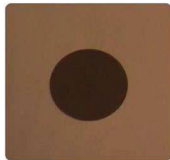

One-Click Cleaners are designed to specially work with female connectors, this instruments cleans the ferrule end faces by removing dust, oil and other debris without nicking or scratching the end face. Euroclust offer you wide range of one-click cleaners for all kind of connectors - LC,SC,FC,ST,ODC,LC duplex, MPO.

The One-Click Cleaner uses the mechanical push action to advance an optical grade cleaning tape while the cleaning tip is rotated to ensure the fiber end-face is effectively, but gently cleaned.

Cleaning of Oil (single-mode 10/125 fiber)
